Projects

Ling Myat Starter Kit 01/2024 – present
Starter Kit for Filament

The kit includes features such as multi-tenancy management with Filament Shield and custom login page customization, providing enhanced functionality for Filament users.
Feel free to customize it according to your preferences!

MSS JavaScript Validation 08/2023 – present
Client side validation for Laravel

The package provides a powerful and efficient way to perform client-side validations in Laravel without the need for page reloads. With our lightweight and fast client-side validation library, you can easily validate your form inputs and ensure the quality of user data before submitting it to your server. When you're building a admin panel or client side form using laravel blade, MSS Js Validation is the perfect solution to enhance your user experience and ensure data integrity.
Dependency: jQuery

EDUplus 05/2023 - present

Teacher, Guardian Student Triad Connector

EDUplus, Educational Platform communicates School, Guardians, Students. The students will get the insight of their own performances and requirements.
